

2buy2 energy basket

Energy Stewardship You Can Trust

**Still the same trusted service, now just under our own name.
No need to start over – Your energy solution continues with 2buy2.**

Over the last 12 years, churches across the country have relied on the energy basket run by 2buy2. That dependable service is still available – just more directly.

You can continue benefiting from the same process, the same supplier and the same dedicated support team you've worked with for years.

What you can expect:

One bill, one supplier

Clear, centralised billing for easy management, and no need for new credit checks or onboarding

Same simple process

Sign a Letter of Authority and you're in

Known pricing model

When pricing is released, you'll know it's competitive

Proven service

96% member retention over our previous basket duration

Pure green electricity

with an option for 100% green gas too

Mission-aligned

We help churches use resources to support ministry and community

Tangible savings

Our previous basket saved churches £millions

12 Years of Exceptional Results

For over a decade, 2buy2 has powered an energy procurement strategy for churches, helping invest more in their mission.

The Impact:

£Millions Saved

Savings with purpose - In 12 years of managing energy for churches in the current basket, we've delivered millions in savings – releasing vital funds to support core mission work and local communities.

Scale Advantage

By aggregating demand across hundreds of churches, we've secured pricing power that benefits every single participant, from the smallest parish church to the largest cathedral.

Why This Matters to You

Our 12-year experience managing energy baskets demonstrates our ability to deliver long-term, sustainable energy solutions for faith communities.

We understand churches face distinct operational challenges that require specialised solutions. From fluctuating occupancy patterns and heritage building restrictions to complex heating systems, church leaders must carefully balance environmental responsibility with fiscal stewardship while staying true to their mission and community commitments.

Church energy management isn't just another sector for us – it's our specialty.

Moving Forward Together

Our transition to offering the 2buy2 Energy Basket marks a significant milestone that delivers tangible benefits to our customers.

Through direct negotiations with Total, our basket energy supplier, we've secured reduced costs for all participants.

Additionally, we've negotiated a one-off retention bonus from Total for members who renew before 31st August 2025—savings that we're passing directly back to our customers.

Your energy stewardship journey continues with the confidence of proven results.
